Latest Project

BarberShop React App

A Web Application to support Small businesses in appointment handling, employee schedule handling, and serve as a web page for customers to make appointments. This App incorporates React and Sass with a Materialize framework for an interactive and visually appealing front-end. The back-end utilizes an Amazon Ec2 instance, Https, RDS (AWS) with Passport for authentication, Express, and an Nginx reverse proxy for security and scalability. The frontend is serverless on Amazon Amplify.
